

— INTRODUCING —

# *RX* for **PRINT**

PRINT TRACKING SOFTWARE

*RXforPrint is an advanced user-centric print assessment and print tracking tool for managed print.*

## **Key Features:**

- Tracks print, by user, by device, by department, by time, and by cost
- Provides print accounting for charge-back, by print job, by user
- Creates a print audit trail to support document security and compliance
- Provides reporting to make print assessments easy to implement

## **Key Benefits:**

- Key user-centric print assessment tool to support Managed Print Services
- Provides a way to manage your customers' print fleet
- Reduces the cost of printing/copying by thousands of dollars/month
- Supports "green" culture

**“** *RXforPrint is a valuable tool for a Managed Print Services strategy. It provides the print assessment data we need to manage our customers' print fleet — efficiently and cost-effectively.* **”**
