

CASE STUDY # 117

Company / User: Fuji/Xerox Thailand .

Many customers do not want their name and information published; our case studies honor their privacy while telling their story.

The Challenge:

Fuji/Xerox Thailand had a client with a difficult IPDS issue that their previous IPDS solution could not resolve. Enter American Printware and our excellent support department. It was determined that Fuji/Xerox's client needed a high speed, secure IPDS solution.

The Solution: IPDSXServe™

IPDSXServe includes a full bi-directional communication interface to the host mainframe for page-level error recovery in the event of a printer malfunction. This is a critical requirement for many IPDS applications such as the printing of checks, financial statements and invoices.

If you have a similar need, please contact our sales staff at 949-488-2222 Ext. 501
